### DETAILED ACTION

#### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-2 & 6-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nakazawa et al. (US Pat. 5,948,200) in view of Langhans (US Pat. 4,378,480).

Nakazawa et al. discloses a method for forming holes in green ceramic sheets. The laser beam is reflected by a galvano-mirror and transmitted through a mask. After the reflected beam passes through the mask it is incident on the ceramic sheet. Multiple through holes are formed. The light transmitting portion of the mask is focused by a lens. A plurality of holes may be formed in the mask. Orthogonality is shown in figure 4. Nakazawa et al. does not specifically teach the use of a polygon mirror.

Langhans teaches forming perforations in a web. The laser beam is reflected from a rotating mirror (polygonal mirror) and the light beam(s) then exist through a lens system and impinge on the web; forming perforations. It would have been obvious to one of ordinary skill in the art at the time of the invention to use a polygonal mirror, as taught by Langhans in the Nakazawa et al. process because it adds speed and efficiency to the process.

*Allowable Subject Matter*

3. Claims 3-5 & 8-10 are allowed.
4. The following is a statement of reasons for the indication of allowable subject matter: the claims as supported by the specification differs from the prior art in that it does not teach specifically the shaping of the laser beam into a line or a rectangle.

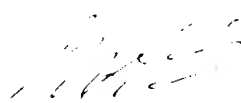

*Conclusion*

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See US PTO-892.
6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to M. Alexandra Elve whose telephone number is (703) 308-0092. The examiner can normally be reached Monday to Friday from 6:30 AM to 3:00 PM.
